Rifaque Ahmed Akrami

Software Engineer | Full-Stack Development | AI Systems | Developer Tools
Bhatkal, Karnataka, India | Open to relocation and remote opportunities
rifaque.rs@gmail.com | linkedin.com/in/rifaque-akrami | github.com/Rifaque | rsxdevelops.dev

Summary

Software engineer experienced in frontend development, full-stack client delivery, API integration, local-first AI applications, and Linux deployments. Focused on developer tools, retrieval systems, and reliable architecture.

Experience

HubZero **Jan 2025 – Present**
Co-founder & Software Engineer *Bhatkal, India*

- Contributed to delivery of HubZero's first paid client project, Bhatkal Time Luxe, a collaborative client engagement, across frontend, architecture/full-stack implementation, database design, and deployment; a co-founder led visual design.
- Built reusable Blueprint foundations and supported infrastructure across Cloudflare, Vercel, DNS, and Linux, including frontend deployment on Vercel and backend hosting on a self-hosted Ubuntu server; contributed to hubzero.in.

RG SmartDiscovery LLP **Aug 2025 – May 2026**
Software Engineer Intern *India (Remote)*

- Developed frontend features and integrated APIs for nxNearby's job portal and AI-assisted course and quiz workflows.
- Implemented quiz-generation UI with prompt controls, question types, and editable output; contributed to chatbot integration, podcast testing, UI development, and debugging.

Projects

Nexus | Voice-First Personal AI Operating Layer *(Private Alpha)* **Jun 2026 – Present**

- Building a Windows-focused voice-first AI system with deterministic command handling, governed tool execution, persistent context, and an adaptive desktop UI.

Atlas | Local-First AI Workspace [GitHub] **Feb 2026 – Sep 2026**

- Released a Rust/Tauri 2, React, and TypeScript Windows workspace for querying indexed code and documents with local LLMs; implemented BM25 and semantic retrieval with Reciprocal Rank Fusion (RRF), source citations, workspace authorization, and unsupported-answer safeguards. v1.0.3 released Sep 2026.

Reflux | Cross-Platform Local Media Client [Source] **Oct 2026 – Present**

- Building a pre-release Kotlin Multiplatform media client that separates works from file versions and sources, with Media3 playback on Android and libmpv on desktop.

QueryCraft | Natural Language Database Querying [GitHub] **Aug 2025 – Jan 2026**

- Primary technical contributor on a three-person final-year project translating natural language into SQL and NoSQL queries using schema-aware prompts and local Qwen/Mistral models.
- Implemented pre-execution validation, query safeguards, a conversational UI, and local inference through Ollama.

ExtendSpace | Windows-to-Android USB Video Streaming **Oct 2026 – Present**

- Prototyping Windows-to-Android USB video streaming with C#/.NET, WinUI 3, Kotlin, Android MediaCodec, Media Foundation H.264, and ADB forwarding.

Technical Skills

Languages: TypeScript, JavaScript, Rust, Python, SQL, C#
Frontend: React, Next.js, Tailwind CSS
Backend / APIs: Node.js, Express.js, REST APIs, GraphQL
AI / Retrieval: Retrieval-Augmented Generation (RAG), local LLM inference, Ollama, Qwen, Mistral, embeddings, BM25, Reciprocal Rank Fusion (RRF), NL2SQL
Databases / Infrastructure: MongoDB, PostgreSQL, Linux, Docker, NGINX, Cloudflare, Vercel
Tools / Platforms: Git, GitHub, Tauri 2, Kotlin Multiplatform, Media3, libmpv, Android MediaCodec, CI workflows

Education

Anjuman Institute of Technology and Management (AITM) **2022 – 2026**
Bachelor of Engineering, Computer Science and Engineering *VTU, Belagavi, Karnataka*
CGPA: 8.36/10
Certification: AWS Cloud Practitioner Essentials | Amazon Web Services | May 2025
