Open to relocation | Available for UAE-based opportunities

Summary

Software Engineer building AI-powered applications and scalable backend systems. Experienced in RAG pipelines, LLM integration, and full-stack development using React, Next.js, and Node.js, with strong foundations in system design and production deployment.

Key Skills

- AI Application Development
- LLM Integration
- API Design
- System Architecture
- Retrieval-Augmented Generation (RAG)
- Database Design (MongoDB, SQL)
- Backend Development (Node.js, APIs)
- Cloud Linux Deployment
- Full-Stack Development (React, Next.js)
- Git-Based Collaboration

Education

Anjuman Institute of Technology and Management

2022 – 2026

Bachelor of Engineering in Computer Science and Engineering

Bhatkal, Karnataka

- CGPA: 8.1/10
- Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Machine Learning

Experience

RG SmartDiscovery LLP

Aug 2025 – Present

Frontend Developer Intern

India (Remote)

- Developing production frontend features using React for a live SaaS platform.
- Collaborating with backend engineers on API integration and system performance optimization.
- Contributing to scalable UI architecture and maintaining clean, modular code standards.

Projects

Atlas - AI Workspace Assistant | Tauri, React, TypeScript, Fastify [GitHub]

Feb 2026 — Present

- Built a local-first AI desktop application using Retrieval-Augmented Generation (RAG) to query codebases and documents.
- Implemented hybrid retrieval (semantic + keyword search) with re-ranking to improve answer accuracy.
- Designed chunking and indexing strategies to reduce hallucinations and improve context relevance.
- Packaged and shipped cross-platform builds (Linux, Windows) with structured release management.

QueryCraft | Next.js, TypeScript, Node.js, MongoDB, Local LLMs [GitHub]

July 2025 — January 2026

- Developed a natural-language-to-SQL system powered by locally hosted LLMs.
- Designed structured output validation and execution safeguards for reliable query generation.
- Built full-stack architecture using Next.js, Node.js, and MongoDB.
- Explored prompt design and constrained generation strategies for production-safe AI outputs.

eCommerce Store | MERN Stack [GitHub]

April 2025

- Built a luxury eCommerce platform featuring 20+ product listings and a fully responsive layout.
- Crafted a modern UI with advanced product filtering for a seamless shopping experience.
- Optimized image delivery using Imgix, reducing load times by 60% and improving Core Web Vitals.
- Exposed RESTful APIs and tuned cross-device performance to support a premium brand experience.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, C

AI & Systems: LLM Integration, RAG Pipelines, Hybrid Retrieval

Frameworks: React.js, Next.js, Node.js, Express.js, Flask, Tailwind CSS

Databases: MongoDB, SQL

Infrastructure: Linux (Ubuntu Server), NGINX, Cloudflare, GCP, Vercel

Tools: Git, GitHub, REST APIs, VS Code

Certifications

AWS Cloud Practitioner Essentials

May 2025

Amazon Web Services (AWS)

Credential ID: 134_3-7977891_1748103524

- Gained foundational understanding of AWS cloud concepts, billing, and infrastructure.
