

Rifaque Ahmed

Software Engineer | Full-Stack • AI Systems • RAG

India | Open to UAE relocation

+91 63642 82251 | rifaque.rs@gmail.com | linkedin.com/in/rifaque-akrami | github.com/Rifaque | hubzero.in

Summary

Product-minded full-stack engineer focused on AI-assisted tools, RAG-based developer systems, and backend-driven products. Co-founder of HubZero with professional experience spanning production software, local LLM applications, retrieval systems, and desktop software engineering.

Experience

HubZero

Jan 2025 - Present

Co-founder & Software Engineer

Bhatkal, India

- Delivered HubZero's first paid client product end to end, owning architecture, full-stack development, database design, and deployment.
- Designed reusable Blueprint foundations combining information architecture, design systems, and implementation patterns across multiple client and product contexts.
- Managed deployment and web infrastructure across Cloudflare, Vercel, DNS, and Linux-based environments; shipped hubzero.in.

RG SmartDiscovery LLP

Aug 2025 - May 2026

Software Engineer Intern

India (Remote)

- Owned the job portal frontend, shipping Easy Apply and AI-assisted application flows through React/Next.js and API integration.
- Replaced manual quiz authoring with AI generation, supporting prompt controls, multiple question types, and editable model output.
- Shipped course purchase, time-zone-aware live scheduling, catalog/marketing pages, and reusable React components against Django REST APIs.

Projects

Atlas | Local-First AI Workspace Assistant [GitHub]

Feb 2026 - Present

- Built and released a local-first Windows desktop assistant with Rust/Tauri 2 that turns code and documents into queryable knowledge bases using local LLMs.
- Implemented RAG with LanceDB, semantic and keyword retrieval, Tree-Sitter-based code relationships, and GraphRAG-style project context.
- Added Git/filesystem timeline intelligence, agentic actions, Secret Shield, and automated Windows/Linux release workflows through GitHub Actions.

QueryCraft | Natural Language Database Querying [GitHub]

Jul 2025 - Jan 2026

- Led a 3-person team building a natural-language database query platform supporting SQL and NoSQL generation with local Qwen 4B/Mistral 7B models and schema-aware prompting.
- Built SQL validation, execution safeguards, conversational UI, and self-hosted local inference using Ollama.

Bhatkal Time Luxe | Client E-Commerce Platform [GitHub]

Apr 2025 - Sep 2025

- Launched a production storefront for a luxury watch retailer, owning architecture, full-stack development, and hosting; improved measured page-load performance through Imgix-based image optimization.

Technical Skills

Languages: TypeScript, JavaScript, Rust, Python, SQL

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL, Django REST

AI / Retrieval: RAG, Ollama, Qwen, Mistral, LanceDB, Embeddings, NL2SQL

Data / Infrastructure: MongoDB, PostgreSQL, Linux, Docker, NGINX, Cloudflare, Vercel

Tools: Git, GitHub, Tauri

Education

Visvesvaraya Technological University (VTU), Belagavi

2022 - 2026

Bachelor of Engineering, Computer Science and Engineering

Karnataka, India

CGPA: 8.36/10

Certification: AWS Cloud Practitioner Essentials | Amazon Web Services | May 2025
